

Impacts of the Coming Technology Wave on Society

About the Event

In support of PNW's "One Book, One University" (OBOU) program this academic year, the College of Engineering and Sciences will host a one-day event, including activities such as panel discussion, debate, and keynote speech, to discuss topics related to this year's book ("The Coming Wave: Technology, Power, and the 21st Century's Greatest Dilemma" by Mustafa Suleyman with Michael Bhaskar) to deepen understanding, cultivate diverse perspectives, and raise public awareness.

Dr. David Staley, historian, designer, and futurist from Ohio State University, will also be joining us by leading panel discussion with industry partners to guide us through diverse perspectives of the impact of technology on society based on past technological breakthroughs and how we can better prepare for the coming wave of artificial intelligence and biomedical engineering. Using the OBOU as context, faculty, staff, students, industry leaders, educators from our region, and experts from various backgrounds will learn about the impacts of technology on culture, politics, governance, economy, medicine, and more!

Agenda

Key Info

Panel Discussion

Moderator

Microsoft

Debate

Munster High School Debate Team

The Munster High School Debate Team has a long-standing tradition of excellence, consistently ranking among the top teams in regional and national competitions. Over the years, the team has earned numerous accolades for its outstanding performance in various debate formats, including Policy, Lincoln-Douglas, and Public Forum.

Recently, they have continued this legacy by securing top placements at state tournaments, showcasing their members' dedication, critical thinking, and eloquence in argumentation.
